NOTE.—The above attendance as per rule, does not always indicate the interest taken in the Hospital by the Governors. Many have been on the afternoon shift on the Governors' Meeting night, and others have had special meetings that they could not put off. Many apologies have been received and throughout the year the average attendance exceeds 20 Governors.

## SIXTEENTH ANNUAL REPORT.

---

**I**N presenting their sixteenth Annual Report to the subscribers and contributors the Governors have every confidence that it will meet with general approval and convince all who are interested in the welfare of the Hospital of its high standard of efficiency and therefore merits a continuance of their past financial support.

The Governors desire to express their irreparable loss by death of the late Mr. F. N. Smith as a very generous supporter of the Hospital from its earliest stages. Also Mr. R. Argile, the designer and architect of the Hospital, a Life Governor, a Trustee, and Supt. Secretary, a man of many parts; also Mr. T. Clarke, one of the most earnest workers of the Hospital from its inception, a Life Governor, a Trustee, and a most regular attender at meetings; also Mr. J. P. Dudley, correctly described as the Vicar of the Hospital, a man devoted to his work and beloved by the Staff and Patients. These great men have passed into the Beyond, but have left to us marked examples of generosity and sympathy for the suffering and devotion to duty. The Governors realise that the Hospital has lost four brave and good men.

**In-Patients.**—The number of in-patients during this year was 101, 19 less than last year, but probably due to the distressed condition of all industries in our area. The number of patients hospital days during the year was 2,113. This works out at 21 days per patient in Hospital. The cost of working the Hospital during the year was £1,210 2s. 7d. The number of Staff days for the year was 2,555, so that the total days represented by the above cost is 4,668. This works out at a cost for Staff and Patients of  $5/2\frac{1}{4}$  per day or £1 16s. 4d. per week, which is slightly less than last year and will no doubt be considered economical. Operations performed on the in-patients during the year were 37. The number of deaths in Hospital was only one, but six were brought in dead, making a total of seven.

**Out-Patients.**—This is, year by year, on the increase and is greatly appreciated in the neighbourhood. The number of patients this year is 244 and the number of dressings 4,931; General Anæsthetic, 48; Local Anæsthetic, 40; Minor Operations, 88. It will be seen from the above figures that this department entails a lot of work for the Staff.

**X-Ray.**—This department continues its essential work under the able supervision of Mr. Hurley. Much suffering is thereby avoided, and for fractures the length of time in Hospital is decreased.

**Sunlight.**—The number of patients was 28, baths 421. The Governors are somewhat disappointed at these results and think it ought to be more frequently recommended by our doctors, as no one can receive treatment except under the doctor's instructions.

**Staff.**—The Governors desire to record their great indebtedness to our consulting surgeon, Mr. Greaves, for his valuable services rendered to the Hospital and upon his advice, the Governors have appointed W. G. Rose, Esq. as hon. assistant consulting surgeon to act in conjunction with Mr. Greaves. This should be a great gain to the Hospital. Our daily Staff have done excellent work during this year and are to be congratulated upon the capable manner they have dealt with a number of serious cases, chiefly due to motor accidents. The Nursing Staff needs no comment, except that which the patients are perhaps too ready to give. They are always equal to all occasions and work most harmoniously together.

**Sports Committee.**—The funds of the Hospital could not have been as they are to-day had it not been for the efforts of this Committee and it will be seen that the Reserve Fund is largely due to their yearly and generous help. Since the Committee was inaugurated, they have contributed no less a sum than £907 7s. 11d., apart from other gifts, such as operating table, special bed, piano, dressing table, etc. The Governors can always depend on their services and gifts. Happily, our president is a great supporter of our Annual Sports and is always present and it is said he pays for any prize Mrs. Mitton selects. Of course, this is but natural.

**Ladies' Committee.**—The Governors pay their sincere tribute of praise to the help derived from the efforts of the Ladies' Committee. They are among the Hospital's best friends, for they buy what the Governors want, which may, or may not, be unusual. They are indeed a valuable asset to the success of the Hospital. No report could be complete without recording appreciation for free services rendered by the Ripley Radio Club for latest news, the Ripley and Heage Flying Clubs for speed; Mr. Hawkins on time; the Hairdressers for the comfort they give so willingly and Mrs. E. Lamb for her excellent egg week. Also the Butterley Male Voice Choir, the Salvation Army, the Lea Brooks Orchestra for their excellent music; the Morris Dancers for their enjoyable flights and the very many friends who, by their subscriptions or goods, have made the path more easy for the Governors. For all these services the Governors are most grateful.

The President, Mr. Mitton, and the Governors are much concerned about the numerous motor accidents that come to our Hospital, and during the year no less than 30 motor accidents were received, which represent 29.7 per cent. of accidents treated this year and who average Hospital days 16. These patients are very largely non-contributors to the Hospital, and, in many instances, even severe cases, no subscriptions have been received. Promises are made, but seldom fulfilled and the Governors realise the necessity of some Government arrangement being made in connection with their motor tax, as will provide for Hospital treatment when such is required. This experience is common to all Hospitals, and is very unfair to the regular contributors, and there seems to be no remedy until the Law compels the necessary provision being made.

**President.**—Our President, Mr. Mitton has given valuable services during the year and by his business abilities affords great financial help year by year, and it is most gratifying to know that he is again unanimously nominated for the coming year.

J. G. BELFITT, Chairman.
